EXCLUSIVE OFFER

TRAINING BUNDLES FOR COMPANY MEMBERS

CMSA offers training to identify and reduce the risk for individuals with complexity.

The Integrated Case Management Program teaches case managers how to engage individuals by creating trusted relationships as they longitudinally assess risk in the four domains of health: biological, psychological, social and health system.

When patients are engaged in their health, they learn self-management, and self-management leads to positive clinical and behavioral outcomes, assisting providers in achieving value-based care metrics, resulting in improved patient satisfaction, healthier individuals and populations and increased reimbursement.

Training and membership in CMSA provide investment in our CM staff to grow and ensure ongoing professional competency.
